Fern Care Hub – VIC 2026

Fern Care Hub is a registered NDIS provider proudly supporting individuals and families across Southeast Melbourne, including the City of Knox, Monash, and Greater Dandenong.

Committed to delivering personalised, high-quality support, Fern Care Hub prioritises meaningful relationships over corporate models. Its services focus on individualised care, life skills development, community participation, and tailored employment readiness programs that empower participants to achieve greater independence and confidence.

Every program is built on four key principles:

Person-Centred Growth – Activities are tailored to each participant's interests, strengths, goals, and aspirations.

Community Connection – Participants build confidence and independence through real-life experiences and active engagement within their local community.

Inclusive and Supportive Environment – A safe, welcoming, and judgement-free space where every achievement is celebrated, and every challenge becomes an opportunity to learn.

Empowerment Through Opportunity – Participants are equipped with practical skills, confidence, and meaningful experiences that support greater independence and lifelong wellbeing.

Fern Care Hub is more than a NDIS service provider—it is building stronger individuals, fostering meaningful connections, and creating a more inclusive and connected community where everyone has the opportunity to thrive.
